This diagram shows the exploded view of the assembly structure. It consists of three main components: a base plate (1), a middle plate (2), and a top plate (3). The base plate (1) is the largest and forms the foundation. The middle plate (2) is positioned above the base plate, and the top plate (3) is positioned above the middle plate. The diagram illustrates how these plates are aligned and connected using screws and washers. The exploded view shows the relative positions of the components and the path of the fasteners.

Diagram 5 shows the top rail being attached to the side rail. Two screws are shown being driven into the top rail, securing it to the side rail. A circular callout with the number 5 is placed near the screws.

Diagram 5 shows the front panel being attached to the frame. The panel is shown being slid into the frame, with dashed lines indicating the alignment of the panel's edges with the frame's rails. The number 5 is circled in the center of the diagram.

Diagram 5 shows the bottom rail being attached to the side rail. The rail is positioned at the bottom of the frame, and the side rail is being attached to it. The diagram shows the rail being attached to the side rail, with the side rail being attached to the bottom rail. The diagram shows the rail being attached to the side rail, with the side rail being attached to the bottom rail.

*Coloque todos os
tapa furos no móvel
